Education background

At the Higher Institute of Cinema in Giza, where I earned my Bachelor of Arts in Animation Film Making, I gained a comprehensive understanding of animation principles, storytelling, and visual aesthetics. My studies covered the technical and creative aspects of filmmaking, including character design, motion graphics, and digital animation techniques. I also learned about scriptwriting, storyboarding, directing, and post-production processes. This education provided me with a solid foundation in visual storytelling and the filmmaking process.
